

ASSEMBLY INSTRUCTIONS FOR BONSAI GIFT KIT

1. Remove components from the box. Cover the bottom of the container with a layer of pebbles for good drainage. Save the remaining pebbles.
2. Remove your tree from the grow pot. Loosen the soil and roots with your fingers, try not to disturb the soil at the center of the root mass. Place your tree in the container and spread the roots loosely keeping them within the container.
3. Fill the container with the bonsai soil to cover all the roots. Pack firmly with your fingers keeping the soil level and slightly below the top of the container.
4. Watering bonsai is very important. Use a misting attachment on a hose or sink to slowly water through the foliage until water drips through the hole in the bottom of the container.
5. Place moss in water for a few minutes then place it on top of the soil around the tree, press firmly in place. Decorate the rest of the surface with the remaining pebbles.
